EDUCATION

- **Master's degree in Bioinformatics**
Alagappa University
2023 – 2025
CGPA – 7.82
- **Bachelor's degree in Bioinformatics**
Bishop Heber College
2020 – 2023
CGPA – 8.28
- **Diploma in Bioanalytical Techniques**
Bishop Heber College
2020– 2021
CGPA – 9.0

SKILLS

Programming & Tools:

Python, Biopython, SQL, Perl, Jupyter Notebook, VS Code

Libraries & Packages:

Pandas, NumPy, Matplotlib, RDKit (Chem, AllChem, DataStructs, Descriptors)

Methodologies:

Molecular Docking & Dynamics, Cheminformatics, Systematic and Targeted Literature Review, NGS Data Analysis (WGS, RNA-seq, DNA methylation), ML Model

Wet lab experience:

Molecular Biology, Microbiological, Cell Culture, Animal handling and Analytical Techniques

SADANA PRITI

BIOINFORMATICS SPECIALIST

PROFESSIONAL SUMMARY

Bioinformatics researcher specializing in computational and experimental drug discovery. Proficient in Python programming, cheminformatics, fragment-based drug design, molecular docking and dynamics, and quantum chemical (DFT) analysis. Experienced in NGS data analysis, cell culture techniques, and animal model studies related to neurodegenerative disorders. Adept at applying machine learning to biological data

WORK EXPERIENCE

Project technical support III

Department of biochemistry and molecular Biology

Pondicherry University, Pondicherry, India | Oct 2025 – present

My current work is on Next-Generation Sequencing (NGS) data analysis including methylation data as well as computer-aided drug design, Animal model and cell culture techniques

Research Intern

Indian Institute of Science, Bangalore, India | May 2024 – Jul 2024

Developed and validated biological network models for ncRNA-protein interactions in *Homo sapiens*

PROJECTS

- In silico molecular docking analysis of Juglans-derived active compounds against the NMDA receptor of autoimmune encephalitis
- A Cheminformatics approach for PROTAC-mediated clearance of Parkinson's disease protein aggregates

CONFERENCE

International Conference on Structural Biology and Drug Discovery (CSBDD-2024)

Global Summit on Innovative Drug Design, Discovery & Translational Research (GLOBALDDT-25)
